Objective

Creative and detail-oriented M.Sc. Information Technology student with strong interests in Full Stack Development and UI/UX Design. Passionate about building scalable web applications, secure authentication systems, and intuitive user experiences while continuously learning modern technologies.

Skills

- **Languages:** C, Python, JavaScript ,Java
- **AI Tools:** GitHub Copilot, Cursor AI, Figma AI, Vercel, Netlify, Framer AI,Spline AI, DeepMotion AI, MotionSite AI, Postman AI,Claude AI,Deepseek
- **Web Technologies:** HTML, CSS, Tailwind CSS, React.js, JSP, Three.js, React Three Fiber,Bootstrap
- **Backend:** Node.js, Express.js, PHP, Flask,Jquery
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase, Redis
- **Tools:** Prisma ORM, Git, GitHub,wordpress
- **Design:** Figma, Canva, Adobe Photoshop
- **Core Subjects:** DSA, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering,Data Mining and warehousing

Projects

MediPredict – ML Health Risk Prediction System Jan 2026
GitHub Link

- Developed an ML-based healthcare prediction system using structured clinical symptom datasets.
- Generated disease risk predictions and preventive healthcare insights for early diagnosis.

RentEdge – Cross-Platform Rental Management App Apr 2025
GitHub Link

- Developed a Flutter-based rental management application with Firebase Authentication.
- Implemented Firestore integration for secure real-time data storage and synchronization.

Task Manager Web Application Jul 2026
GitHub Link

- Built a secure full-stack task management application using React, TypeScript, Node.js, Express.js, PostgreSQL, and Prisma ORM.
- Implemented JWT authentication, task CRUD, search, filtering, dashboard analytics, and secure password management.

Authentication System with Multi-Database Integration Jun 2026
GitHub Link

- Developed secure authentication with PHP, MySQL, MongoDB, Redis, Bootstrap, AJAX, and JavaScript.
- Implemented password hashing, Redis session management, MySQL authentication, and MongoDB profile storage.

3D Avatar Web Trigger – React, Three.js, React Three Fiber May 2026
GitHub Link

- Developed an interactive 3D web application that controls avatar animations using natural language commands.
- Implemented real-time avatar customization and smooth animation transitions with React Three Fiber.

Education

College of Engineering Guindy, Anna University Aug 2023 – Jul 2028
M.Sc. Integrated Information Technology **CGPA: 7.16**

Dr. Vimala Convent Matriculation Higher Secondary School Jun 2022 – Apr 2023
Higher Secondary **89%**
